 Up

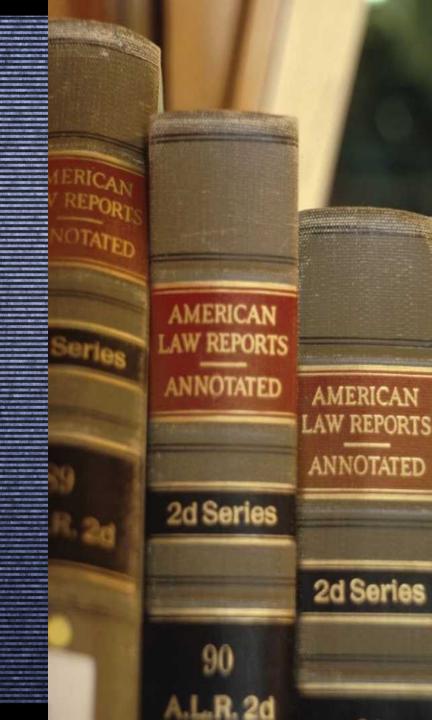

Other Creative Plaintiff Suits

ASBESTOS

- Drilling mud

- Brake pads

Industry Cut Backs

- Fact: High commodity prices continue
- Fact: Downsizing and consolidation continue

•

•

- Concern: Are profit margins driving this trend
 - **Concern:** Is industry losing needed expertise
 - Bottom Line: Safety and environmental protection cannot be compromised

Chris Oynes, Mineral Management Service, "A review of Deepwater Operations" at the Deepwater Operations Forum, Sept. 30-Oct. 1, 2003; Galveston, Texas

2004 MMS Technology Study Requests

Those focused on deepwater:

Risk analysis of subsea vs. surface processing-handling produced water.

Assess subsea system maintenance and intervention-including criteria for decision to shut in.

Risk analysis / assessment of DW subsea gas lifting – including effects of induced thermal stress on risers.

Chris Oynes, Mineral Management Service, "A review of Deepwater Operations" at the Deepwater Operations Forum, Sept. 30-Oct. 1, 2003; Galveston, Texas

2004 MMS Technology Study Requests (cont'd)

Those focused on deepwater:

- Assess composite repair methods for risers, structural members and FPSOs.
- Assess reliability of large diameter steel compliant risers in ultra-deepwater.
 - Fatigue, corrosion and wear
- Assess technology for automatic controlling and testing systems for mainline valves on subsea pipelines.

From 8/13/03 MMS Request for white papers for research proposals

Perry Mason

"[Mason] was not only competent like Joe Friday, he was a nice guy too"

The Defenders

"One of the main purposes of the show [was] to clarify the difference between morality and justice. Morality is the way you feel about an act. Justice is a rational interpretation of the facts."

E.G. Marshall
