

## Basic Life Support for Healthcare Providers (CPR)

### Course Description

This course follows the guidelines of the American Heart Association and is appropriate for health care providers including: EMTs, First Responders, firefighters, police officers, and other health care providers. The course content includes adult one-rescuer CPR, adult two-rescuer CPR, pediatric CPR, and the use of barrier devices such as the pocket mask for rescue breathing. Students must successfully complete manikin skills and a written evaluation. Current BLS certification is required prior to participating in First Responder, First Responder Refresher, EMT-B or EMT-B refresher training.
