Teaching in the Healthcare Professions

"It is only through continuous education and training of educators that our healthcare educational process will evolve into a vehicle by which our students will achieve academically and become highly qualified, innovative healthcare professionals". - Annie J. Daniel, PhD

THIS CERTIFICATE IS DESIGNED FOR VETERINARY & HEALTHCARE PROFESSIONALS

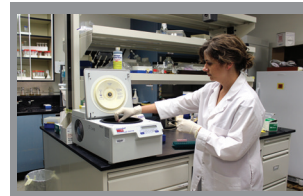

The Certificate in Teaching in the Healthcare Professions is designed for veterinary and healthcare educators/professionals who seek additional preparation for educator roles in academia and healthcare organizations. The common core of course work includes work in curriculum development, instruction, student assessment, program evaluation, education leadership, and education scholarship. Students enrolled in the certificate courses will gain in-depth knowledge in the areas of organizational leadership, research methodology, curriculum development, instructional methods and learning theory, student performance assessment, program and faculty evaluation, and faculty development. Participants will also complete a capstone project, defined as a work of scholarship, which will allow application of knowledge

Gain in-depth knowledge in the areas of organizational leadership, research methodology, curriculum development, instructional methods and learning theory...

institution as a laboratory for the application of practical educational and leadership concepts and for development of their own scholarship.
